The Brazilian Chamber of Commerce would like to invite you to an inspiring evening with “Science without Boarders”

Date 2013/3/6 23:30:00 | Topic: 

On the 14th of March, we will be celebrating the most recent progress made in the relation between Brazil and Sweden and welcome one of the first group of researches that integrate the program “Science Without Boarders” in Sweden.

During this event we will be, among other things, showing cases of how the two countries have benefited from established partnerships in different areas. We will also be promoting the creation of a network for stakeholders who want to get involved, paying attention to activities that are already taking place between Sweden and Brazil, as well as informing about initiatives that are underway. With that purpose, we are gathering Brazilians and Sweds from the academia and industry to celebrate the present, as well as the future of our relation.

Program

18.00-18:30 Mingle;
18:30-18:35 Elisa Sohlman, Executive Director for Brazilcham Sweden;
18:35-18:45 Pontus de Laval, Chairman of The Swedish Brazilian Innovation & Research Center (CISB);
18:45-20:15 Kenneth Löth, Head of Payloads and Rockets Dep. at The Swedish Space Corporation;
20:15-20:20 Closing remarks;
20:20-21:00 Mingle.

DATE: Thursday, March 14th, 2013.
TIME: 18:00 – 21:00
RSVP: Latest, March 12th, 2013 to info@brazilcham.se. For further information, contact Vivian Suzuki at 070 206 08 22.
PLACE: Törngren Magnell, Västra Trädgårdsgatan 8.
During the evening it will be served a buffet of Brazilian appetizers and wine.

Do not forget to confirm your attendance as places are limited.

We look forward to seeing there!

Elisa Sohlman
Executive Director
Brazilian Chamber of Commerce in Sweden

About the Program "Science without Borders"

Science without Borders is a large scale nationwide scholarship program primarily funded by the Brazilian federal government. The program seeks to strengthen and expand the initiatives of science and technology, innovation and competitiveness through international mobility of Brazilian undergraduate and graduate students and researchers.

The program is a joint effort of the Ministry of Education (MEC) and the Ministry of Science and Technology (MCT) through their respective funding agencies — CAPES and CNPq.

The primary goal is to assist 101 thousand Brazilian students and researchers to study at top universities worldwide until 2014. Swedish universities are providing around 2000 study places allocated at 27 different universities.
